Work Experience

2025

Solution/Software Development
- Data Center/Energy Infrastructure Solution
- Industrial/Building Automation Solution

2024

Energy Storage System
- ESS Demo Site (CAD, PLC)
- Field Application Engineering

2023

Document Automation
- Robotic Process Automation (RPA)

Product Development
- Servo Valve (Linear Motor)

2022

Software Development
- Robotic Arm Tool (Python)

2021

Industrial Automation
- Single Axis Robot (HMI, Servo Motor)
- Field Application Engineering

2020

Computer Skills

☆☆☆ ChatGPT (Vibe Coding)
☆☆☆ Python (SQLite/OpenCV/ Numpy/Pandas/Matplotlib)
☆☆☆ JavaScript (Three.js/GSAP)
☆☆☆ AutoCAD (2D CAD)
☆☆☆ Blender/FreeCAD (3D CAD)
☆☆ SOLIDWORKS/CATIA (3D CAD)
☆☆ SimulationX (1D CAE)
☆☆ MATLAB/Simulink (MBD)
☆ ANSYS (3D CAE)
☆ Cura (3D Printing)
☆ FRED (Optical Simulation)
☆ Grafana (SQL) / UiPath (RPA)
☆☆ Google Forms/Sheets/Looker
☆☆ Microsoft Power BI
☆☆☆ Microsoft Office (Word/Excel/PowerPoint)

Language Skills

2023 Permanent Residence VISA
2020 JLPT N1 (Passed)
2015 TOEFL iBT (80 Points)
2010 TOEIC (750 Points)

Education & Internship

2011 – 2018 **Doctor of Philosophy, National Taiwan University (NTU)**
- Graduate Institute of Photonics and Optoelectronics (GIPO)
- Department of Mechanical Engineering (ME)

2016 – 2017 **Visiting Scholar, University of Tokyo (UTokyo)**
- Research Center for Advanced Science and Technology (RCAST)

2013 – 2015 **Intern & Project Executor, Industrial Technology Research Institute (ITRI)**
- Mechanical and Mechatronics Systems Research Laboratories (MMSL)

Qualifications

2025.09 **Japan Association for Financial Planners (JAFP)**
- The 3rd-grade Certified Skilled Professional of Financial Planning Exam

2024.09 **Information Technology Engineers Examination (ITEE)**
- Fundamental Information Technology Engineers Examination

2024.04 **Examination Center for Electrical Engineer (ECEE)**
- Third Class Electrical Chief Engineer

Selected Position & Detailed Description

Research and Development Engineer & Data Analyst

Software Development: Web 3D Demo for Containerized Data Center (JavaScript)

- Designed an interactive website interface optimized for iPad browsers.
- Created a 3D model of a containerized data center, including server racks, cooling units, main distribution panel, surveillance cameras, and fire protection systems.
- Developed a pre-sales tool for automated, customer-specific 2D layout proposals.
- Set up a sales demonstration for a professional presentation at the CEATEC exhibition.

Solution Development: Design and Proposal for Containerized Data Center

- Led the standardization of containerized data center (CDC) designs, covering critical aspects such as cooling systems, electrical configurations, spatial optimization, and more.
- Developed comprehensive proposal materials, including 2D layouts, 3D models, computational fluid dynamics (CFD) simulations, power usage effectiveness (PUE) calculations, and capital expense (CapEx) & operational expense (OpEx), to support project design and implementation.

Software Development: Robotic Arm Simulator (Python)

- Developed forward/inverse kinematics and spatial transformations for a 3D robotic arm simulator, integrating linear algebra and robotics principles.
- Designed a parametric GUI for 3D arm manipulation via joystick, featuring path planning, obstacle avoidance, and automated position setting.
- Synchronized virtual 3D arm motion with servo motors and a 2D top view for real-time path tracking and demonstration.

Industrial Automation: Single Axis Robot (HMI / Servo Motor)

- Developed an HMI interface for servo motion control with mobile-accessible remote control via integrated wireless router.
- Delivered client demonstrations and created training videos to facilitate user understanding and operational training.

Technical Drawing & System Design: Data Center & Energy (AutoCAD / PLC)

- Created 2D drawings including equipment layouts, single-line diagrams, and wiring diagrams.
- Programmed PLC systems to establish communication (RS485/CAN) and monitoring across battery, power conditioning system (PCS), and energy management system (EMS).

Robotic Process Automation: Repetitive Task (UiPath / Python / PowerBI)

- Defined data formats and workflows for tasks such as employee attendance, email automation, and inventory management, while automating dashboard visualizations to streamline data analysis and reporting.

Project/Product Manager & Market Research Analyst

Product Development: Servo Hydraulic Linear Motor

- Collaborated with 5 R&D teams and a valve vendor to develop a cutting-edge product.
- Conducted comprehensive market surveys and analyses, assessing applications, specifications, competitors, and patents to drive product innovation.

Solution Development: Data Center & Energy Infra., Building & Industrial Auto.

- Led the introduction of new solution packs to the Japan market, collaborating with clients to develop proof of concepts (POCs) that demonstrated solution effectiveness.
- Conducted market research and analysis to identify trends and opportunities, informing strategic decisions and product development.

Main Projects: Digital Transformation

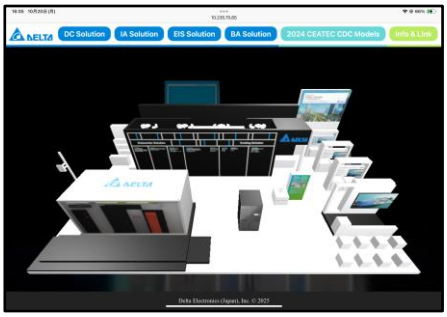
CEATEC Exhibition: Web 3D Demo for DC / IA Solution Presales Tool (2025)

Device
a) Laptop
b) iPad
c) Buffalo Router
d) TV Monitor

Language
a) JavaScript

Library
a) Three.js

Function
a) Homepage: Booth Plan 3D Model
b) DC Solution: Selection / Filter Mode
c) IA Solution: Automation Machine



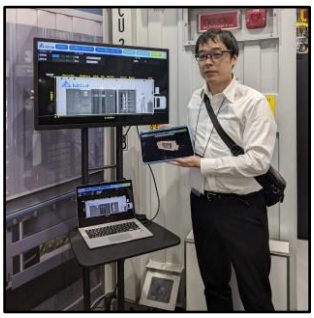
CEATEC Exhibition: Web 3D Demo for Containerized Data Center (2024)

Device
a) Laptop
b) iPad
c) Buffalo Router
d) TV Monitor

Language
a) JavaScript

Library
a) Three.js

Function
a) Interactive Website for iPad Browser
b) 3D Model & 2D Layout Demonstration
c) Pre-sales Tool for Professional Presentation

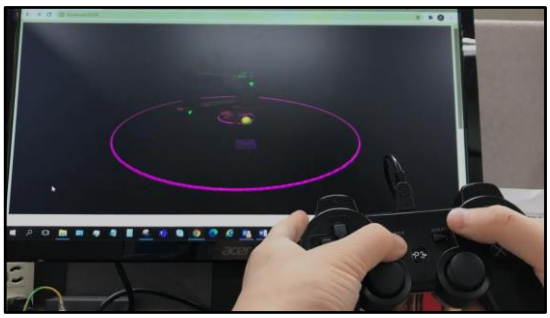


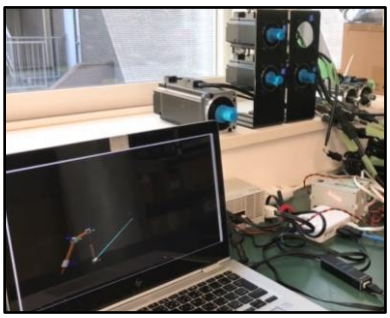
Robotic Arm Simulator (2022)

Language
a) Python

Library
a) Vpython

Function
a) Joystick Control
b) Pick & Place
c) Digital Twin



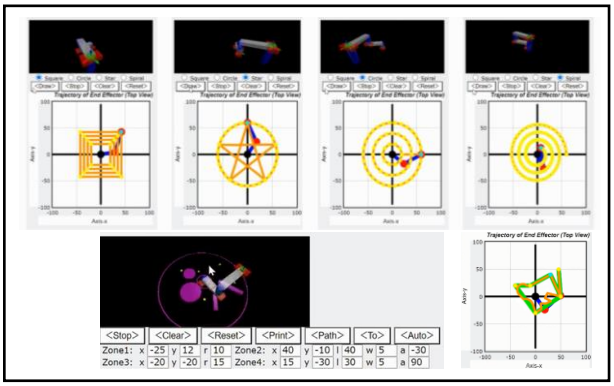


Robotic Arm Tool (2021)

Language
a) Python

Library
a) Vpython

Function
a) 3D Model with Parametric Design
b) Path Planning
c) Obstacle Avoidance



Single Axis Robot (2020)

Device
a) HMI
b) Servo Motor
c) Ball Screw

Function
a) Jog Mode
b) PR Mode (Position Register)
c) Edit Mode (VEL / ACC / DCL)
d) Remote Control with Pad/Phone

Side Projects: Digital Automation

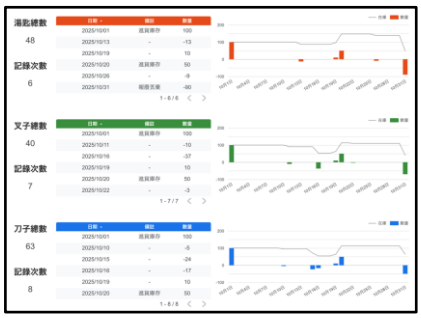
Business Intelligence Dashboard for Data Visualization (2025)

Google Forms → *Input Data* → Google Sheets → *Auto Plot* → Looker (PART OF Google Cloud)

#1 Blood Pressure Tracker

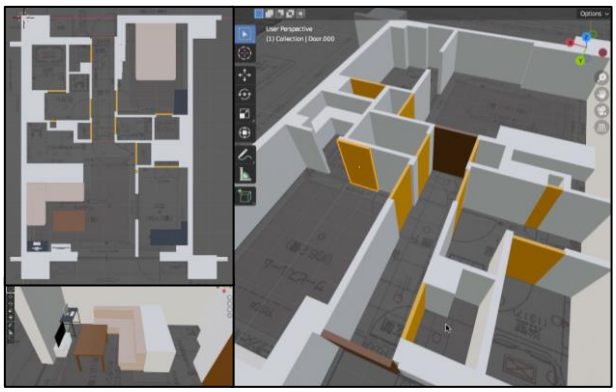
#2 Group Expense Splitter

#3 Inventory Management



Interior Design Floor Plan (2024)

blender



BIM Automation (2025)

blender + python

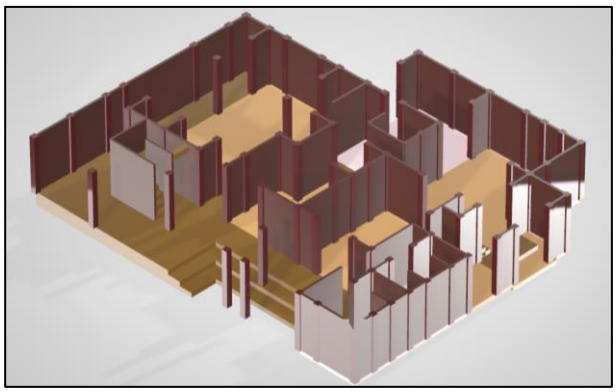


Image Recognition (2022)

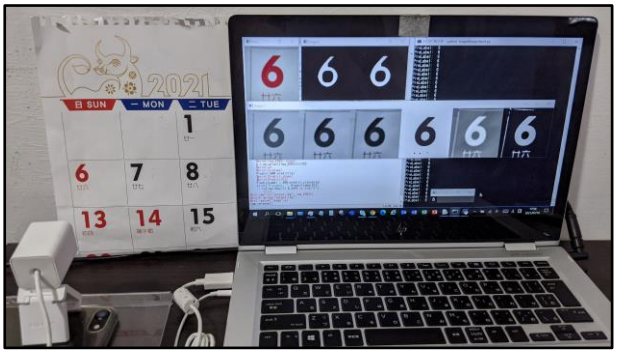
Device
a) Camera (300,000 pixel)

Library
a) OpenCV
b) Keras/Tensorflow MNIST

Language
a) Python

Function
a) Reading Number



IoT Visualization (2023)

Device
a) SwitchBot Plug (Sensor)
b) Buffalo Router

Platform
a) Grafana (SQL)

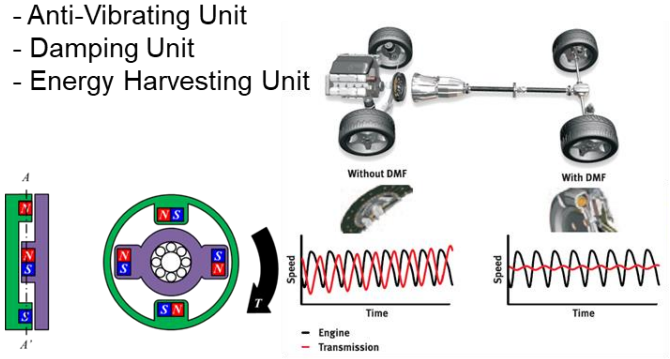
Language
a) Python

Function
a) Real-time Data Visualization

Doctoral Dissertation & Internship Projects

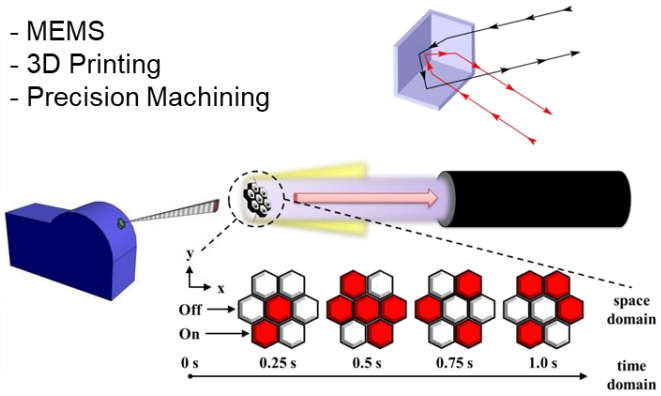
NTUME: Magnetic Dual Mass Flywheel

- Anti-Vibrating Unit
- Damping Unit
- Energy Harvesting Unit



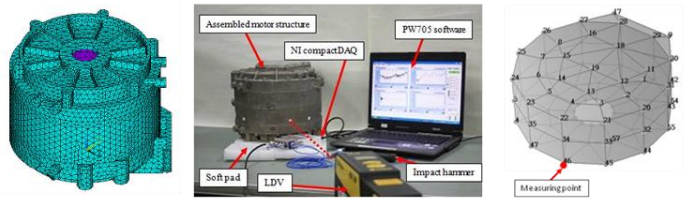
NTUGIPO: Tunable Corner Cube Retro-Reflector

- MEMS
- 3D Printing
- Precision Machining



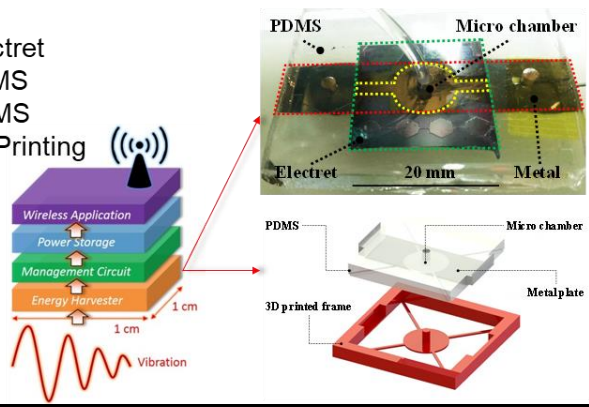
ITRI: Motor Structure and Transmission System

- Finite Element Method
- Modal Analysis & Testing
- Harmonic Response Analysis
- Rotor Dynamic Analysis



UTokyo: Electret-Based Energy Harvester

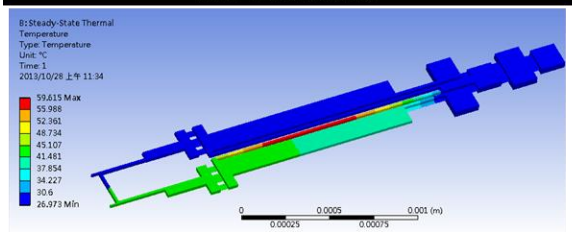
- Electret
- PDMS
- MEMS
- 3D Printing



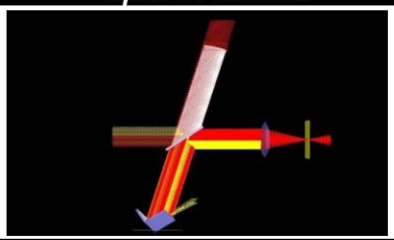
Software Experience

CAD Software

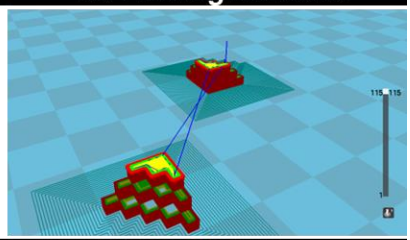
CAE Software



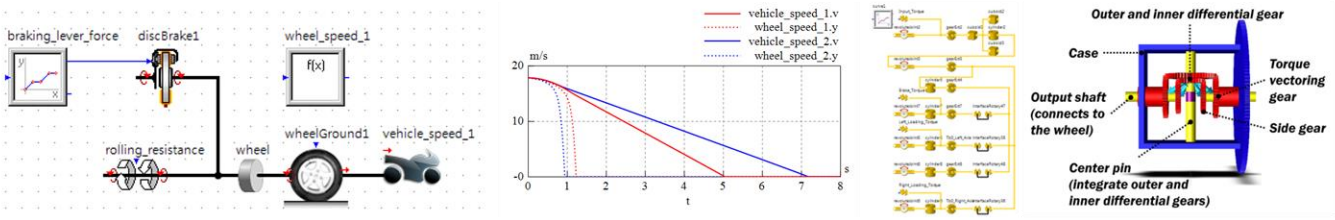
Optics Software



3D Printing Software



Multi-Physics Simulation Software



Publications & Presentations
